Dear Shareholder,

Introduction

While 2020 will go down in history as one of the most difficult post war periods we have experienced I am pleased to report that in the circumstances Highcroft have delivered a commendable performance with net rent after bad debt provisions falling just 3.4% to £5.46m.

Property portfolio

Over the last few years we have purposefully repositioned the portfolio significantly, moving away from high street retail and into warehouses and onto well located out of town retail parks, to reflect the changing patterns of consumer behaviour. Whilst all retail locations were hit hard by lockdowns throughout 2020 it is fair to say that high street retail took the worst of it with retail parks fairing slightly better due to their ability to adhere more easily to social distancing rules and work as click and collect locations for online orders. At the year end, high street retail represented just 7% of the total portfolio with retail warehouses at 26% and warehouses at 46%. The positive trends on warehouse demand and values during the year partially offset the decline in capital values for retail assets, meaning that the valuation of the Highcroft portfolio fell by only 5.4% to £82.1m by the year-end. This compares favourably to the MSCI UK all property index which fell by 6.2% over the same period.

Due to the levels of uncertainty created by the COVID-19 pandemic we chose not to buy or sell any assets during the year and instead concentrated on working closely with our tenants to ensure we minimised rental voids and empty units. Our rental collection for 2020 is 94% of the contractual rent due. We also kept our debt levels conservative and manageable with our ratio of net debt to property value at 29% and an LTV of 33%. The overall impact on the company's net assets for the year was a reduction of just 6%.

People

When times are tough like they were in 2020 it is far too easy to just focus on the fact that returns for the year have been negative. Whilst not what we had hoped to deliver, it is easy to forget that in exceptional years like this the team have to go above and beyond their normal duties to protect shareholder value. To that end, I would like to thank the team at Highcroft for all their hard work and dedication during the year.

On 10 December 2020 David Kinglerlee announced that he would be representing the interests of our largest shareholder, Kinglerlee Holdings Limited, on the board and, with effect from 7 April 2021 (the date of signing of the year end accounts), would change his status from an executive director to a non-independent non-executive director. I would like to thank David for his contribution to the business over the many years he has worked as an executive director.

Dividend

Whilst we recognise the importance of dividends to our shareholders, we must balance this with ensuring we keep sufficient cash available to take account of unforeseen circumstances in what continue to be unpredictable times.

The Company's interim dividend was held at 21p as a result of good rent collection levels, and we are proposing a final dividend of 30p per ordinary share taking the total ordinary dividend for the year to 51p. When deciding on the final dividend for 2019 and interim dividend for 2020 we took certain rent collection projections into account. As actual rent collection have been strong we are also declaring a special dividend of 6p per ordinary share for 2020, making the total dividend payable in May 2021 36p per ordinary share.

Outlook

This time last year when we released our 2019 full year results, we were aware of the COVID-19 outbreak and the first 3-month UK wide lockdown had commenced. I certainly didn't think that a full year later we would only just be starting to see signs of the country getting back to some resemblance of normality.

Whilst we have a well-diversified portfolio, a relatively low level of gearing and a healthy cash balance, as a board we will continue to take a cautious approach to managing our portfolio and the group to ensure we can weather any further market volatility and continue to deliver long term shareholder value.

	2,484	2,829

On 7 April 2021 the directors declared a final property income distribution for 2020 of £1,553,000, 30.00p per share, together with a special property income distribution for 2020 of £311,000, 6.00p per share, (2019 final property income distribution of £1,397,000, 27.00p per share) both payable on 27 May 2021 to shareholders registered on 23 April 2021.

3 Earnings per share

The calculation of earnings per share is based on the total loss after tax for the year of £1,147,000 (2019 profit £1,154,000) and on 5,172,465 shares (2019 5,167,240) which is the weighted average number of shares in issue during the year ended 31 December 2020. There are no dilutive instruments.

In order to draw attention to the profit that is not due to the impact of valuation gains and losses, which are included in the statement of comprehensive income but not available for distribution under the company's articles of association, an adjusted earnings per share based on the profit available for distribution of £3,503,000 (2019 £4,055,000) has been calculated.

In accordance with IAS 40 the carrying value of investment properties is their fair value as determined by independent external valuers. This valuation has been conducted by Knight Frank LLP, as external valuers, and has been prepared as at 31 December 2020, in accordance with the Appraisal & Valuation Standards of the Royal Institution of Chartered Surveyors, on the basis of market value.

The historical cost of the group's investment properties is £76,832,000 (2019 £76,832,000).

Valuation process

The valuation reports produced by the independent external valuers are based on information provided by the group such as current rents, terms and conditions of lease agreements, service charges and capital expenditure (if any). This information is derived from the group's property management and financial information systems and is subject to the group's overall control environment.

In addition, the valuation reports are based on assumptions and models used by the independent valuer. The assumptions are typically market related such as yields and discount rates and are based on their professional judgement and market observation. Each property is considered a separate asset class based on the unique nature, characteristics, and risks of the property.

During 2020, many valuations were reported with material valuation uncertainty clauses on certain classes of assets. However, valuation markets are mostly functioning again, with transaction volumes and other relevant evidence at levels where an adequate quantum of market evidence exists upon which to base opinions of value. Accordingly, our independent valuers have confirmed that the valuation at 31 December 2020 is not reported as being subject to material valuation uncertainty.

The executive director responsible for the valuation process verifies all major inputs to the external valuation reports, assesses the individual property valuation changes from the prior year valuation report and holds discussion with the independent valuer. When this process is complete, the whole board then meet the valuer in the presence of the auditor. The valuation report is recommended to the audit committee, which considers it as part of its overall responsibilities.

Valuation technique

The fair value of the property portfolio has been determined using an income capitalisation technique whereby contracted and market rental values are capitalised with a market capitalisation rate. The resulting valuations are cross checked against the equivalent yields and the fair market values per square foot derived from comparable recent market transactions on an arm's length terms.

These techniques are consistent with the principles in IFRS 13 Fair Value Measurement and use significant unobservable inputs such that the fair value measurement of each property within the portfolio has been classified as level 3 in the fair value hierarchy. In 2019, all investment properties were classified were with level 2 inputs. The change to the classification to level 3 is to comply with best practice and for comparison purposes.
